DETAILED ACTION

Status of Claims

Claim 7 was amended.

Claims 1-8 are pending.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a chaotic privacy system for analog signals. The independent claims identify the uniquely distinct feature of generating and demodulating a cipherwave by processing analog signals with key stream information generated by using the same private key in both the key stream generator of the transmitter and the receiver to produce the respective key streams. The prior art, Pecora et al. (U.S. 5,379,346), disclose a conventional nonlinear (chaotic) system that synchronizes the transmitter and receiver during communications fails to anticipate or render the above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
